PRECI-DIP PUSHES STANDARDS IN SPRING-LOADED TECHNOLOGY AND HELPS PIONEER IN THE DIVERSIFIED FIELD OF COMMUNICATIONS

From the beginning preci-dip has sought to deliver quality interconnecting solutions that provide customers with a broad range of advanced products in the communication industry.

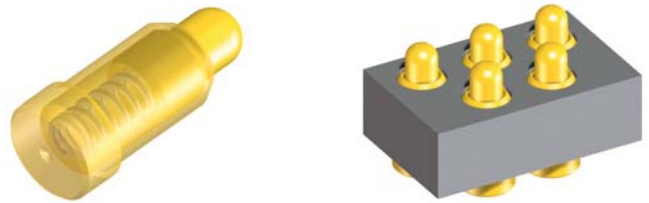

STATE-OF-THE-ART

Preci-dip's state-of-the-art technology has introduced to the market superior connectors and application components.

The blueprint at preci-dip with regards to this most emblematic of industries remains as it always has been since it became a major player in the marketplace: robust and scalable products designed to be reliable under extreme conditions so as to provide the best possible electrical performance.

The communication industry is also scrambling to play a dominant role in the miniaturization revolution. At preci-dip our know-how and dedication to innovation have allowed us to hold a leadership position in the development of small interconnect solutions capable of supporting repeated mechanical stress and adaptable to customer need with a variety of pin height configurations.

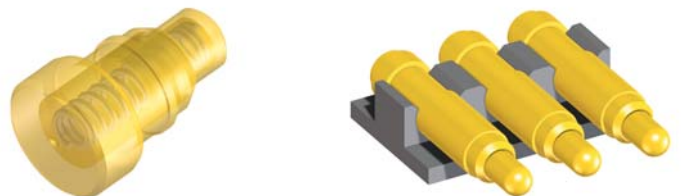

SPRING-LOADED CONTACT (SLC) CONNECTOR AND SOCKETS

- Miniature SLC for fine pitch arrangement

- 3-way BTB interface connector RF application
- 3-way socket connector for battery application

- SLC for flex antenna connection
- Parallel surface mount SLC for pick & place automatic assembly
