

Lifecycle of our products

preci-dip

Dear customers,

You buy products from our company. We are satisfied. These products are REACH and RoHS compliant.

In order to guarantee in the lifecycle of our products a minimal environmental nuisance. Please follow the disposal instructions below.

1. DISPOSAL INSTRUCTIONS

1.1 Introduction

Preci-Dip SA is committed to protecting the environment. This commitment also implies the obligation to easily eliminate the various products and associated packaging of Preci-Dip SA when used. This is indeed possible because, Preci-Dip SA products and their packaging are "non-hazardous waste" and benefit from recycling processes implemented around the world.

1.2 Products

The table below gives an overview of the Preci-Dip SA product categories and their disposal possibilities. This table takes into account the possibilities of modern grinding and sorting technologies, generally eliminating any manual dismantling.

A	Products containing mainly metals (contacts, SLC, ...) Recycling of metals in accordance with national law
B	Products containing mainly plastics (pedestals, connectors, ...) Recycling of plastics in accordance with national law.

1.3 Packaging

To prevent Preci-Dip products from being damaged during transport and storage, it is essential to pack them.

Preci-Dip SA strives to limit the amount of packaging as much as possible. The packaging materials used are essentially paper, cardboard; tubes, trays and polyethylene film (PE). These are materials that benefit from recycling processes around the world that even pay for money in many cases.

In the case of particularly fragile products, foam is used, it must be energy recovery or be disposed of with normal industrial waste.
