OEHHA COMPLIANCE CERTIFICATE

Dear Customer,

Proposition 65 requires companies to warn Californians about significant exposures to cancer-causing chemicals, birth defects, or other reproductive harm. These chemicals may be found in products purchased by Californians, at home or at work, or released into the environment. By requiring this information to be provided, Proposition 65 allows Californians to make informed decisions about their exposure to these chemicals. The latest version of Proposition 65 dated May 25, 2018 contains about 900 substances.

All substances and preparations used in the manufacture and packaging of products have been examined. We compared them to the Proposition 65 list. We are automatically informed of each change in the Proposition 65 list. All customers will find the latest version of the OEHHA certificate on the Preci-Dip website (www.precidip.com//assistance)

Preci-Dip declares that to date, none of the substances contained in our products and packaging are included in the Proposition 65 list.
